Waste and Minerals Planning

enzygo provides specialist consultancy advice for waste and minerals planning. We operate throughout the United Kingdom providing sound and robust advice for the public and private sectors. Our Waste and Minerals Planning team have over 50 years experience between them and can advise on the best approach and development strategy.

Due to the contentious and sensitive nature of waste and minerals developments, Enzygo always seeks to develop at an early stage a clear and co-ordinated approach to gaining planning permission. We provide a comprehensive service for developers and operators of all sizes in the waste, energy and mineral sectors.

Waste Planning

Enzygo offers full consultancy services which benefit operators in all sectors of the waste management industry. Our consultants have extensive industrial and practical experience, and are able to provide a high quality bespoke service to each and every one of our clients.

The Waste & Minerals Planning team at Enzygo has substantial experience within the waste management and renewable energy sectors. We aim to deliver results that are cost effective and practical for our clients. We provide planning advice and support to a wide range of public and private sector clients, such as waste operators, utility companies, local authorities, landowners and property developers, as well as asset management firms.

Minerals Planning

Enzygo offers a full range of consultancy services to the minerals extraction industry. The team has a wide range of

experience within the minerals industry including advice, preparation and submission of planning applications for a wide range of mineral operations.

Environmental Co-ordination

Enzygo's consultants have acted as environmental co-ordinators on Environmental Statements for a range of projects including waste, minerals and energy schemes. Environmental Regulators have increased their requirement for a coordinated approach to environmental planning and the provision of SEA, EIA, Sustainability appraisals and due diligence.

The Enzygo landscape team contains experienced environmental consultants who manage and undertake environmental impact assessment work, taking responsibility for managing the delivery of a range of services including SEA, EIA, sustainability appraisals and due diligence. With

responsibility for effectively managing and delivering environmental project work within given timescales.

Planning Policy

Waste and Minerals developments represent one of the most intricate and constantly-evolving areas of planning law. Enzygo's Waste & Minerals Planning team keeps abreast of the most current and up-to-date planning policy and planning law cases to ensure we provide the best possible advice.
